

# A SHORT ANALYSIS OF FRENCH FIRST NAMES

Started as an easy project

After all only 4 features

But took longer and got more complicated than I expected

A couple of cool insights:

- General stats

Total number of people born in France

- only 345 names with more than 3 people with it in every single year between 1900 and 2015

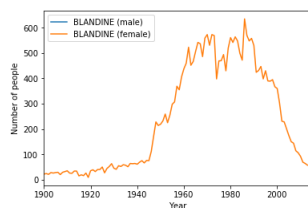

- evolution of some names well correlated to world even, ex: Kim, characters' names (function?)

- can see dip in births, a different way to see the impact of the two WW, not in deaths but in diminution of births

- more and more rare names: popular name represent less % of the pop, number of different names increase

- Trend in some names (iane, ette)

Number of Blandine in France between 1900 and 2015:  
Total: 27631  
Male: 0  
Female: 27631  
Number of Blandine in France in 1988:  
Total: 548
